Problem Based Learning Team Evaluation

Instructions: One component of the evaluation of problem based learning is the evaluation of team members by their peers. For this course, each student will evaluate those on the team in the areas of team support (attending meetings, performing a fair share of the work, etc.) and intellectual contribution. The evaluation scheme asks that you assign yourself a grade of 85 in each of these areas. You then assign each team member a grade in the range 0 to 100, relative to your grade. For example, someone supporting the team much more than you did may receive 100. Someone supporting the team much less than you did may receive a 30.

Fill in the table below with your name, the names of your team members, and their grades. Also fill in the name of the project. Return this sheet to the instructor within one week of the due date of the assignment.

Project:

<i>Name</i>	<i>Team Support</i>	<i>Intellectual Contribution</i>
(you)	85	85
